

PROJECT MANAGEMENT

When a client comes to EPS with their abstract ideas, our expert team manages every aspect of the project to ensure a successful build, installation, and operation.

EPS SOLVES THE PROBLEMS OF THE PROJECT

- Taking on complex challenges, regardless of the project's size, scope, or scheduling.
- Applying our expertise in technical direction and fabrication oversight to keep a project moving forward.

CLIENT REPRESENTATION

- Specifying the right equipment for the job without the biases of typical equipment manufacturers.
- Advocating for the project on behalf of the owner, and ensuring that vendors come together for a cohesive project.

SCOPE OF SERVICES WE OVERSEE

- Technical Design
- Show Programming
- Electrical Design/Engineering
- Mechanical Engineering
- Structural Engineering
- Fabrication
- Installation

OMEGA MART

Building upon the success of its previous installation in Santa Fe, the arts and entertainment group Meow Wolf planned to bring another immersive and interactive experience to Las Vegas, based upon the idea of a grocery store with hidden portals that transport guests to other realities. EPS was brought in to translate the artists' creative visions into constructible designs that were built and then installed inside the 25,000-square-foot facility. EPS coordinated with a large project team to manage the facility model and deliver fabrication drawings for dozens of walkable structures—from a double-helix slide to multi-leveled catwalks and platforms. Multimedia art installations are mounted across every wall and ceiling of Omega Mart. EPS provided means of attachment, access and maintenance, as well as coordination of power and data for all Audio, Video and Lighting elements.

Location:

Las Vegas, Nevada

Year Opened:

2020

Services Provided:

Project Management
Mechanical Design
Structural Design

Client:

Meow Wolf

Established in 2007 in the entertainment capital of Las Vegas, EPS is comprised of a talented team of mechanical and electrical designers, engineers, project managers, artists, technicians, riggers, and installers that are ready to work alongside our partners to take on any challenge.
