

RIGGING & INSPECTIONS

From scenic and acoustical systems to decorative art and LED walls, EPS' team of ETCP-Certified Riggers has the experience to design and inspect systems for any venue.

SIMPLE TO COMPLEX

- Specializing in arenas, theaters, attractions and entertainment complexes, clients turn to EPS to maintain and inspect their acrobatic, fall protection, rigging and mechanical installations.
- Providing approachable and experienced staff with the knowledge to deliver a thorough inspection complete with identifying and offering solutions to critical safety issues.

UNBIASED INSPECTIONS

- Evaluate rigging and mechanical systems regardless of the initial vendor.
- Assess the state of a system and develop a maintenance plan to fit the needs of the equipment.
- Perform comprehensive calculations to ensure structures can withstand dynamic loads of the unique rigging systems.

MARKETS WE SERVE

**Performance Venues

and Shows**

TRAINING

Corporate entities with in-house rigging staff as well as individual professionals gain valuable technical skills and recertification through EPS' comprehensive training programs.

CUSTOMIZED CORPORATE SOLUTIONS

- Providing hands-on instruction for your workforce at our training facility or with the familiar equipment at your venue.
- Our ETCP-Certified Riggers and experienced training staff provide curriculum customized to your team's needs.

EXPERT INSTRUCTION FOR INDIVIDUALS

- Teaching beginning through advanced levels in subjects such as rigging, fall protection, performer flying, safety standards, and more.
- Conducting regular workshops and multi-week courses in person or online.

Established in 2007 in Las Vegas, EPS is comprised of a talented team of mechanical and electrical designers, engineers, project managers, artists, technicians, riggers, and installers that are ready to work alongside our partners to take on any challenge.
